WHY TONG METAL?

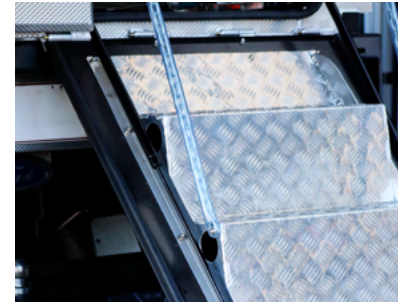

- 📍 Built in Brisbane using quality Australian trusted materials wherever possible
- 🔧 Engineered for touring durability
- 🌟 Designed for real off-road conditions
- 🕒 More than 23 years in business
- 👍 Proven by customers who tour the Cape, the Outback and everywhere in between

KEY FEATURES

TWIN-FOLD ROOF

The twin-fold roof opens up to a comfortable 2.2 m standing height using premium canvas. It creates a spacious interior that feels open and easy to move around in.

STEP ACCESS

A sturdy, well-positioned step gives you proper access into the camper. It makes getting in and out safer and more comfortable, especially when carrying gear or setting up camp in uneven terrain.

CURVED REAR DESIGN

Our curved rear design does more than improve the look of the camper. It increases headroom and opens up the interior, creating a more spacious and comfortable living area.

SIX FLYSCREEN WINDOWS

In-house designed flyscreen windows provide generous ventilation and a clear 360° outlook. The canvas covers can be zipped open or closed, letting you manage airflow and privacy with ease.

SIGNATURE CURVED MESH DOOR

Breathe easy as fresh air flows in while bugs stay out. This rear mesh screen uses fine insect netting for mozzie and midge protection, with a canvas cover for added privacy and light control when you need it.

SLEEPING AREA

Rest comfortably on a full queen-size bed designed for long days on the road. Generous space and supportive structure ensure you sleep well, whether you are touring the coast or camping off-grid.

LOUNGE AREA

Relax or work in a space designed to adapt to your day. This lounge area transforms into a practical workspace, giving you room to plan, eat or unwind no matter where you pull up.

OUTDOOR KITCHEN SET UP

Cook easily with a functional outdoor kitchen built for real travel use. Smart storage and a practical layout give you quick access to your essentials, keeping everything tidy and within reach.

INTEGRATED WATER TANK

100-Litre stainless steel water tank is built into the camper for easy access from both sides. Both gravity-fed and pump-fed setups, giving you reliable water on the road for cooking, cleaning or showers.
